Today's Action: Give PPE to delivery people & others who need it

FACT:

Many companies that rely on gig worker labor and even large corporations like FedEx and Home Depot are not providing potentially life saving masks and gloves to their front-line workers.

Action:

1. If you have access to masks and gloves, put together packages of these items and make them available to those who deliver take out food, groceries and other items to your home.
2. You can also [download our sign here](#) so people know they can take a package.
3. If you have an outdoor umbrella stand, a staple gun and a wooden pole or stick, you can easily make a "take one" stand in front of your door or driveway!
4. You can also carry individual mask and gloves plastic bags to give to workers you see who do not have them.
